store_location with the highest S

What is the business doing well?

Coffee and morning trading are the engine of the business — 38.6% of revenue and 33.1 % of revenue respectively. Sustainably Grown Organic Lg alone brings in R 21 152, and Hell's Kitchen leads the network with 33.8% of revenue.

What is underperforming?

Closing hours trading contributes only 4.5% of revenue, Saturday is the weakest day at R 96 894, and 38 products sit in the low-volume, low-revenue quadrant while contributing just 20.8% of revenue.

Where is the biggest opportunity?

Transaction value. Baskets average 1.44 units and 52.1% of transactions are single-item, so a modest attachment gain across 149,116 transactions outweighs any single product initiative.

What should management investigate?

The R 6 454 revenue gap between Hell's Kitchen and Lower Manhattan, the closing hours trading window, and the long tail of low-contribution products.

What should the CEO do next?

Launch a morning-led bundle featuring Sustainably Grown Organic Lg and the strongest Coffee lines. Introduce an attachment prompt on every single-item transaction (drink + bakery pairing). Test a time-boxed offer in the closing hours window before reviewing its trading hours. Then review the weakest day and the bottom of the product range.

Business risks & alerts ⓘ

RISK	SEVERITY	EVIDENCE	RECOMMENDED RE: store_location with the highest S
Data quality items requiring attention	Low	Constant-value columns: 2	Review the Data Quality page; unresolved issues distort every downstream metric.
Closing hours trading is materially weak	Low	Closing hours delivers 4.5% of revenue on an average transaction value of R 4,69.	Decide between activating the period commercially or reducing cost exposure in those hours.

Executive summary ⓘ

Revenue: R 698 812 from 149,116 transactions and 214,470 units between Jan 01, 2023 – Jun 30, 2023, at an average transaction value of R 4,69.

Momentum: June revenue moved +6.2% versus May.

Products: Coffee is the strongest category at 38.6% of revenue, and Sustainably Grown Organic Lg is the leading product at R 21 152 (3.0%).

Trading: Morning is the strongest period with 33.1% of revenue, Monday the strongest day, and Hell's Kitchen the leading location at 33.8% of revenue.

Opportunity: baskets average 1.44 units, so attachment selling is the largest lever — R 0,50 added per transaction is worth R 74 558 at current volumes.

Risk: Closing hours trading (4.5% of revenue) and Lower Manhattan (32.9%) lag the rest of the business.

REVENUE

Revenue base and transaction economics

Observation

The filtered business generated R 698 812 across 149,116 transactions in Jan 01, 2023 – Jun 30, 2023.

Evidence

Average transaction value is R 4,69, average units per transaction 1.44, revenue per unit R 3,26.

Business impact

Transaction volume, not basket size, is the main revenue lever: baskets average under 2 items.

REVENUE

June grew month-on-month

Observation

June revenue was R 166 486 versus R 156 728 in May.

Evidence

Month-on-month growth of +6.2% — (current – previous) / previous.

Business impact

The latest full month sets a higher revenue base.

Recommended action

Repeat the promotional mix that worked

Data Quality

Analytical layer built on the Bright Coffee transaction file. No customer or margin data is inferred.

Recommended action

Protect footfall in peak periods and use attachment offers to lift average transaction value above R 5,16.

REVENUE

Revenue concentration

Observation

Coffee is the largest category and the top 10 products carry a large share of the business.

Evidence

Coffee contributes 38.6% of revenue and 39.2% of transactions; the top 10 products contribute 25.4% of revenue.

Business impact

Revenue is reasonably spread across the range, limiting single-product dependency.

Recommended action

Continue balancing the range while pushing the strongest performers harder in peak periods.

PRODUCTS

Sustainably Grown Organic Lg is the revenue leader

Observation

Sustainably Grown Organic Lg (Drinking Chocolate) is the single largest revenue product in the current selection.

Evidence

R 21 152 revenue, 4,453 units, 2,961 transactions, 3.0% of revenue at an average price of R 4,75.

Business impact

This product anchors category performance and is the most reliable promotional vehicle.

Recommended action

Feature Sustainably Grown Organic Lg in bundles during morning trading and never allow it to go out of stock.

PRODUCTS

Volume leader and revenue leader are different products

Observation

Earl Grey Rg sells the most units, while Sustainably Grown Organic Lg earns the most revenue.

Evidence

Earl Grey Rg: 4,708 units for R 11 770 (R 2,50 per unit).
Sustainably Grown Organic Lg: 4,453 units for R 21 152 (R 4,75 per unit).

PRODUCTS

Product portfolio shape

Observation

38 products qualify as Stars while 38 sit in the underperforming quadrant.

Evidence

Quadrants use median units (3,630) and median revenue (R 9 225) as thresholds. Underperformers contribute 20.8% of revenue.

Data Explorer

Data Quality

Analytical layer built on the Bright Coffee transaction file. No customer or margin data is inferred.

Business impact

High-volume, low-value products consume service capacity without matching revenue.

Recommended action

Use Earl Grey Rg as a traffic driver and pair it with a higher-value item to lift revenue per transaction.

A long tail of low-contribution products dilutes menu focus and inventory attention.

Recommended action

Review the bottom quadrant for delisting, repricing or repositioning, starting with Dark chocolate, Earl Grey, Spicy Eye Opener Chai.

TRADING HOURS

Morning is the strongest trading period

Observation

Morning generates more revenue than any other period in the dataset's time buckets.

Evidence

Morning: R 231 396 (33.1% of revenue) from 48,846 transactions. Peak transaction period is Morning with 48,846 transactions.

Business impact

Staffing, stock and promotion effectiveness all peak in this window.

Recommended action

Build morning-focused bundles around Coffee and schedule the strongest staffing into this window.

TRADING HOURS

Closing hours is the weakest trading period

Observation

Closing hours contributes the smallest revenue share of all trading periods.

Evidence

Closing hours: R 31 382 (4.5% of revenue) from 6,695 transactions at an average transaction value of R 4,69.

Business impact

Fixed operating cost is carried across a period with materially lower revenue return.

Recommended action

Test a time-limited offer in the closing hours window, or review whether trading hours in that window are justified.

TRADING DAYS

Monday is the best trading day, Saturday the weakest

Observation

Monday leads on revenue while Saturday sits below the weekly average.

Evidence

STORES

Hell's Kitchen is the leading location

Observation

Hell's Kitchen outperforms Lower Manhattan on revenue.

Evidence

Hell's Kitchen: R 236 511 (33.8% of revenue, ATV R 4,66). Lower Manhattan: R 230 057 (32.9%, AT

 Data Explorer

 Data Quality

Monday: R 101 677. Saturday: R 96 894, -2.9% versus the daily average of R 99 830.

Business impact

The revenue gap between the best and weakest day is a recoverable opportunity.

Recommended action

Run a targeted Saturday promotion and protect Monday with full staffing and stock.

Business impact

Closing the gap at Lower Manhattan is worth roughly R 6 454 in the current period.

Recommended action

Compare product mix and trading-hour mix between Hell's Kitchen and Lower Manhattan and transfer the winning playbook.

TRANSACTION BEHAVIOUR

Baskets are dominated by small transactions

Observation

Single-item transactions make up the largest behavioural band.

Evidence

52.1% of transactions are single-item, contributing 42.8% of revenue. Average units per transaction is 1.44.

Business impact

Small incremental attachment across many transactions is the highest-leverage revenue move.

Recommended action

Introduce a food-with-drink attachment offer — Coffee plus a packaged chocolate item — at the point of sale.

Recommended CEO actions

Data Quality

Analytical layer built on the Bright Coffee transaction file. No customer or margin data is inferred.

Evidence: Morning already carries 33.1% of revenue and 48,846 transactions.
Expected impact: A 5% lift in morning revenue is worth R 11 570 in the current period.

02 High priority Transaction value confidence 84%

Introduce an attachment prompt on every single-item transaction (drink + bakery pairing).
Evidence: Average transaction value is R 4,69 with 1.44 units per transaction; 52.1% of transactions are single-item.
Expected impact: Adding R 0,50 to every transaction is worth R 74 558 across the current period.

03 High priority Weak trading period confidence 76%

Test a time-boxed offer in the closing hours window before reviewing its trading hours.
Evidence: Closing hours delivers only 4.5% of revenue (R 31 382).
Expected impact: Recovers revenue from hours that already carry fixed operating cost.

04 Medium priority Trading days confidence 71%

Run a Saturday activation (loyalty double-stamp or bundle) to lift the weakest day of the week.
Evidence: Saturday revenue is R 96 894, -2.9% against the daily average.
Expected impact: Bringing Saturday to the daily average would add R 2 936.

05 Medium priority Stores confidence 68%

Run a store-performance review at Lower Manhattan using Hell's Kitchen as the benchmark.
Evidence: Lower Manhattan contributes 32.9% of revenue against 33.8% at Hell's Kitchen.
Expected impact: Matching the leading store would add about R 6 454 this period.

06 Medium priority Product range confidence 74%

What is the business doing well?

Coffee and morning trading are the engine of the business — 38.6% of revenue and 33.1% of revenue respectively. Sustainably Grown Organic Lg alone brings in R 21 152, and Hell's Kitchen leads the network with 33.8% of revenue.

What is underperforming?

Closing hours trading contributes only 4.5% of revenue, Saturday is the weakest day at R 96 894, and 38 products sit in the low-volume, low-revenue quadrant while contributing just 20.8% of revenue.

Where is the biggest opportunity?

Transaction value. Baskets average 1.44 units and 52.1% of transactions are single-item, so a modest attachment gain across 149,116 transactions outweighs any single product initiative.

What should management investigate?

The R 6 454 revenue gap between Hell's Kitchen and Lower Manhattan, the closing hours trading window, and the long tail of low-contribution products.

What should the CEO do next?

Launch a morning-led bundle featuring Sustainably Grown Organic Lg and the strongest Coffee lines. Introduce an attachment prompt on every single-item transaction (drink + bakery pairing). Test a time-boxed offer in the closing hours window before reviewing its trading hours. Then review the weakest day and the bottom of the product range.
